John M. Anderson: The Substance of Language

Three-volume pack

John M. Anderson,
University of Edinburgh

The three linked but independent volumes of *The Substance of Language* collectively overhaul linguistic theory from phonology to semantics and syntax to pragmatics and offer a full account of how linguistic related to function. They comprise a powerfully coherent understanding of the nature of language and a major contribution to linguistic theory.

OCTOBER 2011 1,232 pages,
978-0-19-969602-4 | Hardback, 3 vol pack | ~~£195.00~~ £156.00

Also available as three separate volumes:

The Domain of Syntax

Volume I

Explores the consequences for syntax of assuming that language is grounded in cognition and perception. He considers whether this permits a lexicalist approach to syntax that would allow it to dispense not only with structural mutations but with universal grammar itself.

OCTOBER 2011 448 pages,
978-0-19-960831-7 | Hardback | ~~£85.00~~ £68.00

Morphology, Paradigms, and Periphrases

Volume II

This volume is concerned with the role of the lexicon, in particular its inflectional morphology, in mediating between syntax and phonology. It examines the expressive role of inflection and the notion of grammatical periphrasis and what these reveal about the substantive differences between verbs and nouns.

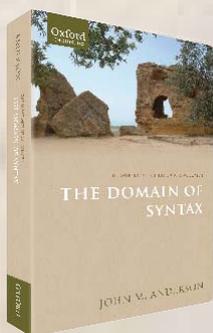

OCTOBER 2011 352 pages,
978-0-19-960832-4 | Hardback | ~~£75.00~~ £60.00

Phonology-Syntax Analogies

Volume III

Looks at the degree to which analogies between syntax and phonology result from their being representational subsystems within the overall system of language, at why they sometimes break down, and at how far semantic and phonetic properties limit such analogies.

OCTOBER 2011 432 pages,

Dissolving Binding Theory

Johan Rooryck,
Leiden University, and
Guido Vanden Wyngaerd,
Hogeschool-Universiteit
Brussels

This book examines the distribution and interpretation of anaphors and pronouns. Through a detailed analysis of simplex and complex anaphors in Dutch and English, as well as other Romance and Germanic languages, the authors show that the relationship between an anaphor and its antecedent can be captured in terms of general Minimalist principles.
